

NATIONWIDE STAINLESS

STAINLESS STEEL STOCKHOLDERS & PROCESSORS

+44 (0) 114 275 5199

sales@nationwidestainless.co.uk

As a company we pride ourselves on offering a professional and efficient service to all our customers throughout the UK and across the globe serving different sectors: Nuclear, Oil & Gas, Petrochemical, MOD, Food, Construction, Refractory and High Temperature Applications.

Every day, from our Sheffield factory, we dispatch materials of all types - whether stock or processed items working with customers to meet tight delivery schedules.

PLATE AND SHEET STOCK (Available cut to size)

Large stocks of plate and sheet held in; 304L, 316L, 321, 310S & Duplex. We are the UK's largest stockholder of 310S plate and sheet.

Plates and sheets can be cut to customer requirements with additional holes/slots if required.

Guillotine capacity up to 4 meter long and 15mm thick.

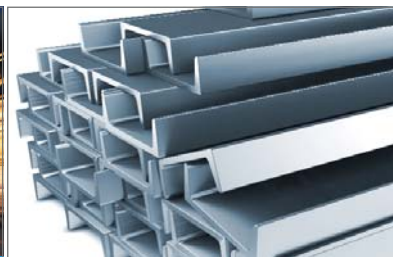

PROFILED PLATE AND SHEET (HD Plasma, Laser & Waterjet)

With in-house CAD technology parts can be drawn and nested to best suit the customer.

Parts can be cut by either HD Plasma, Laser or Water Jet.

Profiled parts manufactured to order.

COLD FORMED ANGLES AND CHANNELS

Angles and channels formed on CNC press brakes to standard and none standard sizes.

Up to 4 meter long and 15mm thick. Longer and thicker sections can be achieved by special request.

Hot rolled angles and channels are also available.

ROUND, SQUARE, HEXAGON AND FLAT BAR STOCK

Large stocks of round, square, hexagon & flat bars held in; 303, 304L, 316L, 321, 310S & Duplex.

All bar products can be offered cut to length.

We specialise in High Tensile bars to numerous specs such as B8 class 2, B8M class 2, A2/80 and A4/80.

SAW CUTTING

Capable of cutting material up to 16" diameter. Sawn blanks available from all stock material on short lead times.

FORGING AND HOT ROLLING

All forging and hot rolling requirements are available to customer specification whether standard or none standard sections; square, flat or round. All grades available with a quick turnaround.

THREADED BARS, FASTENERS AND FIXINGS

Fully threaded or partially threaded bars with the option of thread rolled or cut thread in all grades. We also offer a wide range of fasteners and fixings in all grades.

PIPE, TUBE AND HOLLOW BAR

Pipes, tubes and hollow bars available in seamless and welded sections.

Most grades and sizes available.
