

Construction and Civil Engineering products

For many years Nationwide Stainless has supplied companies throughout the UK and across the globe with high quality stainless steels and alloys for use in the construction and civil engineering industries.

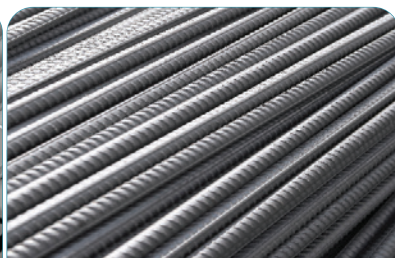

Every day, from our Sheffield factory, we dispatch materials of all types – whether stock or processed items working with customers to meet tight delivery schedules.

Stainless Steel Dowel bars

Large stocks are held in stainless steel round bar enabling us to supply cut to length dowel bars delivered to site as quickly as possible.

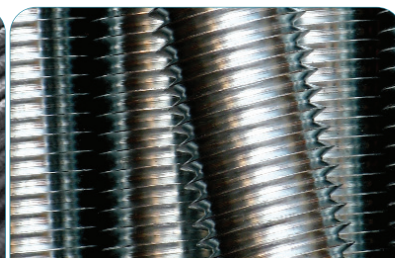

Grades Available: 304L, 316L, 321, 310S, Duplex & Super Duplex.

Stainless Steel Ribbed Bar (rebar)

We are able to supply stainless steel rebar in stock lengths, cut to length, cut & bent and with threaded ends.

Grades Available: 304 (1.4301), 316 (1.4436), Duplex (1.4362), LDX (1.4162), Duplex (1.4462).

Stainless Steel Threaded Bars

Nationwide Stainless hold large stocks of stainless steel threaded bar in all diameters in various stock lengths.

Bars can also be supplied cut to length with chamfered ends. We also specialise in high tensile threaded bar.

Grades Available: 304 (A2), 316 (A4), A2-70, A2-80, A4-70, A4-80, B8 Class 2, B8M Class2.

Stainless Steel Fasteners and Fixings

All types of stainless steel fasteners and fixings are available, whether nuts, bolts, washers or screws are required, Nationwide stainless can supply in all types and sizes.

Grades Available: 304 (A2), 316 (A4).

Plate and Sheet Stock (Available cut to size)

Large stocks of plate and sheet held in; 304L, 316L, 321, 310S & Duplex.

We are the UK's largest stockholder of 310S plate and sheet.

Plates and sheets can be cut to customer requirements with additional holes/slots if required.

Guillotine capacity up to 4 meter long and 15mm thick.

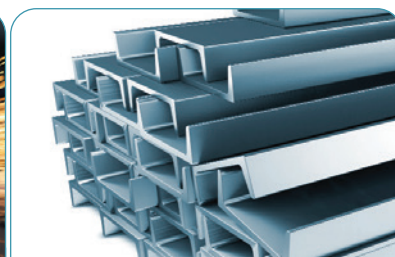

Profiled Plate and Sheet (Hd Plasma, Laser & waterjet)

With in-house CAD technology parts can be drawn and nested to best suit the customer.

Parts can be cut by either HD Plasma, Laser or Water Jet.

Profiled parts manufactured to order.

Stainless Steel Angles And Channels

Angles and channels formed on CNC press brakes to standard and none standard sizes.

Up to 4 meter long and 15mm thick.

Longer and thicker sections can be achieved by special request.

Hot rolled angles and channels are also available.

Stainless Steel Tube and Pipe

Tubes, pipes and hollow bars available in seamless and welded sections.

Materials can be supplied in standard 6mtr stock length or cut to size.

Most grades and sizes available.
